

a

What is claimed is

1. A handset comprising:
 - a user interface comprising an input, a display for presenting an item,
 - 5 and selection means coupled to the input for selecting an item presented on the display;
 - means for defining a first boundary in one display direction;
 - means for defining a second boundary in a further display direction;
 - means for providing a contracted version of an item which fits within
 - 10 the first and second boundaries; and
 - means for providing a corresponding expanded version of the item which fits within the first boundary and expands in the further display direction;
 - control means, coupled to the selection means, expanded version
 - 15 provision means and contracted version provision means, for controlling operation of the display to present the contracted or expanded version of the item;
 - wherein when the contracted version of the item is presented on the display and selected by the selection means, the control means controls the
 - 20 operation of the display to present the corresponding expanded version.
2. A handset as claimed in claim 1, wherein the first display direction is the direction of the width of the display.
- 25 3. A handset as claimed in claim 2, wherein the first boundary is defined by the width of the display.
4. A handset as claimed in any preceding claim, wherein the second boundary is defined by the depth of a display line.
- 30 5. A handset as claimed in claim 1, wherein the first display direction is the direction of the depth of the display.

Sub 94
Sub CS
16. A handset as claimed in any of claims 12 to 15, wherein the key means comprises navigation means.

17. A handset as claimed in claim 16, wherein the navigation means is a scroll key, such as a roller key.

Sub CS
18. A handset as claimed in any preceding claim, wherein the item to be presented is a user defined item and the handset comprises means for storing that item.

10 19. A handset as claimed in any of claims 1 to 17, further comprising a radio receiver for receiving an item to be presented on the display, and for forwarding the item to the contracted and expanded version provision means.

15 20. A handset as claimed in any preceding claim, wherein the item is one of a selection of items to be presented together on the display.

20 21. A handset substantially a hereinbefore described, with reference to, and/or as illustrated in, any one, or any combination of Figures to of the accompanying drawings.

22. A communication device substantially a hereinbefore described, with reference to, and/or as illustrated in, any one, or any combination of Figures to of the accompanying drawings.

25 23. A radiotelephone substantially a hereinbefore described, with reference to, and/or as illustrated in, any one, or any combination of Figures to of the accompanying drawings.

30 24. A handset comprising:
a user interface comprising an input, a display, and selection means coupled to the input for selecting an item to be presented on the display;

Add C1

means for providing an expanded version of an item;

means for providing a corresponding contracted version of the item to fit within a predetermined portion of the display; and

control means, coupled to the selection means, expanded version
5 provision means and contracted version provision means, for controlling
operation of the display to present the contracted or expanded version of the
item;

wherein, when the contracted version of the item is presented on the
display and selected by the selection means, the control means controls the
10 operation of the display to replace the contracted version with the
corresponding expanded version.
